ART UNIT

PAPER NUMBER

2162

DATE MAILED: 07/12/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/758,485

Applicant(s)

ABDO ET AL.

Examiner

Giovanna Colan

Art Unit

2162

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 January 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-19 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 15 January 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date: _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

1. This action is issued in response to applicant filed application on 01/15/2004.
2. Claims 1 – 19 are pending.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1 – 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 9, and 17 recite the limitation “if so”. This limitation includes alternate claim language, which renders the claim indefinite. It is unclear to the examiner which step is included if the step is not met (such as, “if not”).

Claims 1, 9, and 17 recite the limitation “the prior application”. There is insufficient antecedent basis for this limitation in the claim. It is unclear to the examiner which prior application the claims refer to.

Any claim not specifically addressed, above, is being rejected as incorporating the deficiencies of a claim upon which it depends.

Appropriate correction required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1- 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Agrawal et al. (Agrawal hereinafter) (US Patent No. 6,513,029 B1, filed: August 1, 2000).

Regarding Claims 1, and 9, Agrawal discloses an apparatus for performing a query in a relational database system by operating upon a plurality of relations each comprising a plurality of tuples formed over a plurality of attributes, comprising:

a data storage device storing said relations (Col. 7, lines 3 – 10, a database, Agrawal), and

a processor evaluating join predicates in said query to determine whether a join involving a first relation and a second relation will be reductive of said first relation (Fig.

6, item 601, 602, and 603, Col. 15, lines 26 – 30 and 43 – 46; respectively, Agrawal¹), and if so, performing said query by the prior application of a look-ahead predicate based upon the second relation in the join (Fig. 6, item 603, and 601, Col. 15, lines 51 – 55 and 58 – 59, Agrawal²).

Regarding Claims 2, and 10, Agrawal discloses an apparatus wherein said processor determines whether a relation involved in the join is subject to a selection criterion (Fig. 9, items 902, and 903, Col. 16, lines 56 – 62, Agrawal³), and evaluates whether that selection criterion effects a join reduction (Fig. 9, item 904, and 905, Col. 17, lines 11 – 16, Agrawal).

Regarding Claims 3, and 11, Agrawal discloses an apparatus wherein an amount of join reduction effected by a selection criterion is determined by identifying whether the number of rows in the join result will be smaller than the number of rows in the first relation (Fig. 9, item 904, Col. 17, lines 5 – 10, Agrawal).

Regarding Claims 4, and 12, Agrawal discloses an apparatus wherein, upon identifying a join reduction involving a first and a second relation (Fig. 9, item 904, Col.

¹ Wherein V1 and V2 correspond to the first relation and second relation claimed; and wherein the step of eliminating corresponds to the step of reducing as claimed.

² Wherein the step of estimating the number of rows through the optimizer corresponds to the step of using a look-ahead predicate as claimed.

³ Wherein the selection conditions correspond to the selection criteria claimed.

17, lines 7 – 10, Agrawal⁴), and a selection criterion on the second relation, the potential benefit of that join reduction is assessed (Fig. 9, item 905, Col. 17, lines 9 – 10 and 22 – 26, Agrawal⁵).

Regarding Claims 5, and 13, Agrawal discloses an apparatus wherein said processor evaluates the computational expense of generating a look-ahead predicate comprising the tuples of the second relation matching the selection criterion (Col. 17, lines 52 – 55, cost – based pruning, Agrawal), and comparing said expense to computational savings that result from the join reduction (Col. 18, lines 29 – 32 and 36 – 42, Agrawal).

Regarding Claims 6, and 14, Agrawal discloses an apparatus wherein, upon identifying a beneficial look-ahead predicate (Col. 17, lines 22 – 26, Agrawal), processing the query by forming and utilizing the look-ahead predicate as a selection criterion on the second relations (Col. 17, lines 27 – 28, Agrawal).

Regarding Claims 7, and 15, Agrawal discloses an apparatus wherein said processor identifies the most beneficial look-ahead predicate among all potential joins of relations in said query, through iterative analysis of all possible joins (Fig. 5, Col. 15, lines 3 – 7, Agrawal).

⁴ Wherein the “if” statement that includes the step of obtaining the Min size corresponds to the step of identifying a join reduction as claimed.

⁵ Wherein obtaining an estimate of the view size from the query optimizer corresponds to assessing the potential benefit as claimed.

Regarding Claim 8, and 16, Agrawal discloses an apparatus wherein said processor iteratively analyzes all possible joins of the remaining relations (Col. 15, lines 41 – 43, by recursively getting the parents, Agrawal) and the look-ahead predicate to locate further beneficial look-ahead predicates (Col. 15, lines 51 – 54 and 58 – 59, estimate the number of rows ... from the query optimizer, Agrawal).

Regarding Claim 17, Agrawal discloses a program product comprising:

a relational database comprising one or more relations, each relation comprising one or more tuples on one or more attributes (Col. 7, lines 3 – 10, a database, Agrawal), and

relational database system adapted to perform a query on said relational database by evaluating join predicates in said query to determine whether a join involving a first relation and a second relation will be reductive of said first relation (Fig. 6, item 601, 602, and 603, Col. 15, lines 26 – 30 and 43 – 46; respectively, Agrawal⁶), and if so, perform said query by the prior application of a look-ahead predicate based upon the second relation in the join (Fig. 6, item 603, and 601, Col. 15, lines 51 – 55 and 58 – 59, Agrawal⁷), and

signal bearing media bearing the relational database and the relational database system (Col. 6, lines 10 – 15, Agrawal).

⁶ Wherein V1 and V2 correspond to the first relation and second relation claimed; and wherein the step of eliminating corresponds to the step of reducing as claimed.

⁷ Wherein the step of estimating the number of rows through the optimizer corresponds to the step of using a look-ahead predicate as claimed.

Regarding Claim 18, Agrawal discloses a program product wherein the signal bearing media comprises transmission media (Col. 6, lines 10 – 15, Agrawal).

Regarding Claim 19, Agrawal discloses a program product wherein the signal bearing media comprises recordable media (Col. 5, lines 24 – 30, Agrawal).

Prior Art Made Of Record

1. Agrawal et al. (US Patent No. 6,513,029 B1, filed: August 1, 2000) discloses an interesting table-subset selection for database workload materialized view selection.
2. Pham et al. (US Patent No. 6,757,677 B2) discloses providing a join plan using group-by operator.
3. Non – Patent Literature: “Using Join Operators As Reducers In a Distributed query Processing”, Ming – Syan Chen and Philip S. Yu, IBM Thomas J. Watson Research Center, 1990 IEEE.

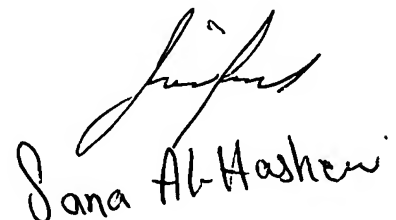

Point Of Contact

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Giovanna Colan whose telephone number is (571) 272-2752. The examiner can normally be reached on 8:30 am - 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Breene can be reached on (571) 272-4107. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
